Saw Bench

# roselli

*made in Italy*

# S-M650

The Rosselli circular saw bench with sliding bench underwent some important changes and improvements over the years. This important evolution makes the Rosselli circular saw bench safer, more reliable and more robust. The S-M650 model is equipped with a 2HP (1,5kW) engine; the S-M655 model is equipped with a 3HP (2,2kW) engine. Trapezoidal belts characterized by high performance and durability permit the movement transmission from the driveshaft to the shaft. This system allows to take up all possible recoils and stress on the driveshaft. The machine is equipped with sliding protection and a sliding worktop (860x360mm) moves on high quality bearings.

These bearings are strong enough to resist to strong pressure and continuous movements and they moves on another worktop. This circular saw bench is equipped with a Ø450 steel blade that allows to do 16 cm cuts because it is possible to use the whole blade surface. This machine is completely built in Italy respecting European standards and it gives priority to security.

## New security rules - UNI EN 1870-6:2018

Extension pour la table

Drain for vacuum cleaner for wood chips

Protection system

**Minimum-tension reel** : in case of black out, it prevents the automatic restart of the machine; it must be activated using the special switch.

**Thermal** : in case of engine overheating (due to an inadequate current or to excessive workload) it stops the machine working, avoiding damage to the engine.

**Emergency brake** : the machine is equipped with a life saving device. As required by European rules, by pressing the emergency button, the blade stops within ten seconds.

Optional

Wheel axle

Optional

Widia blade

Optional

Pneumatic wheels

Model	Blade diameter	Dimensions Maximum	Cutting depth	Working Table		Supply	Weight
	(mm)	LxBxH - (mm)	(mm)		(mm)		(Kg)
